Code Smell (56)

Search by name...

🙀 Bug 🔷 Major 🕝

Having all branches in a when or if chain with the same implementation is an error. Either a copy-paste error was made and something different should be executed, or there shouldn't be a when/if chain at all.

Noncompliant Code Example

```
if (b == 0) { // Noncompliant
     doOneMoreThing()
} else {
     doOneMoreThing()
when (i) { // Noncompliant
   1 -> doSomething()
   2 -> doSomething()
   3 -> doSomething()
    else -> doSomething()
}
```

Exceptions

This rule does not apply to if chains without else-s, or to when-es without else clauses.

```
if (b == 0) {
    doOneMoreThing()
} else if (b == 1) {
    doOneMoreThing()
}
```
